

# What is markdown?

---

Markdown is an easy-to-learn markup language that allows you to write plain text documents with some simple formatting options. It does not require tags and uses less resources than document editors, like Google Docs. Markdown is also future proof due to working with plain text.

# What is Linux?

---

Linux is popular Operating System similar to Unix. It is widely used in the academic and business environments. Linux is made up of kernel, utilities, and libraries.
